

## Insulated Copper Tube

Keyword:	insulated copper pipe, insulation copper pipe, copper tube, copper pipe
Application:	The insulated copper tube is widely used for installation of air-conditioner.
Alloy:	C12200 (UNS), SF-Cu 2.0090 (DIN), Cu-DHP CW024A (EN)
Temper:	Soft drawn
Standard:	ASTM EN JIS KS BS DIN
Package:	Plastic bag and carton
Heating Resistance:	120 degree for both heating and cooling
Length:	3m, 5m, 6m, 7.5m, 15m, 18m, 20m, 25m and 30m
Insulation:	The insulation is a double layered structure made of cross linked foam polyethylene with closed cells. The insulation tube is good for anti-UV, heat resistance, low water absorption.
